Application deadline	15 July (Non-EU) 31 July (EU)
Tuition fees per semester in EUR	None
Joint degree / double degree programme	Yes
Description/content	The Business Administration with Informatics programme is perfect for anyone who regards himself or herself as an internationally active team player in business and who would like to develop solutions in the field of applied informatics. The course of study combines a broad and comprehensive education in business administration with information technology. A focus is set on modern business enterprise tools such as SAP and e-commerce. Students from more than 60 countries, taught by international lecturers, already learn the characteristics of intercultural

cooperation during their studies.

The standard period of study is seven semesters. The study course offers a solid basic education in the two core areas of business and IT. In the area of "Business Administration", students acquire comprehensive knowledge of business administration, financial accounting, business mathematics, economics, marketing, entrepreneurship and innovation, and logistics. The second core area, "Information Technology", includes modules such as enterprise resource planning, business analytics, information management systems, data management and e-business. Moreover, students acquire a profound knowledge of business English as well as soft skills relevant for their professional career. A selection of business and IT electives addresses the latest needs of the global labour market in the field.

The multicultural learning environment hones the ability to interact appropriately and successfully with individuals from different cultural groups. All lectures are exclusively taught in English. This allows students to improve their language level to international standards and later communicate successfully in companies around the world without difficulties.

South Westphalia University of Applied Sciences

Campus view
© Fachhochschule Südwestfalen

South Westphalia University of Applied Sciences has campuses in Hagen, Iserlohn, Meschede, Lüdenscheid and Soest and offers a wide spectrum of studies in modern, trend-setting issues and subjects. This is not a "mass production" university. Studying here is application-oriented, group sizes are manageable, and teaching takes place in a face-to-face situation. In the 2023/2024 winter semester, 10,900 students were enrolled at all campuses.

The university focuses mainly on engineering, natural sciences, information and communication technology, business administration with informatics, and agriculture.

South Westphalia University of Applied Sciences maintains close contacts with industry, agriculture and trade. It is actively involved in working on solutions to current problems in the region, thus gaining experience for application-oriented study. At the university, companies can find expert advice on innovation and technology, and joint projects have often led to the development of product and process innovations. With many final theses being written in cooperation with companies, research and teaching are successfully linked. Several research institutes have been founded and thus the university has broken new ground in the area of cooperation with local industry.

0

University location

The campus is located a few minutes' walking distance from the city centre. The cosy city of Soest offers everything from shopping to culture as well as historic restaurants and pubs. Although a thousand years old, it is not in the least antiquated. The surroundings provide all kinds of leisure activities, including water sports. Soest is conveniently located with regard to transport facilities, with regular IC and ICE train connections as well as two nearby airports, Dortmund and Paderborn-Lippstadt.

For a first impression of Soest, please visit https://www.so-ist-soest.de/de-wAssets/docs/service/medienbereich-downloads/WMS_Stadtrundgang_Flyer_englisch_20210224-final.pdf.
