Combined Master's degree / PhD programme

Joint degree / double degree programme

Description/content

The substantive idea for the course has been the subject of discussions and meta research within the European consortium of the EuroMPM for many years. The technical focus is based on three fundamental pillars:

- Standards, processes, methods and tools of project management form the technical basis of the Master's training. There is no restriction to a standard (such as ICB, PMBOK, PRINCE2). Rather, the standards are the content of study. A certification on the basis of a standard is not intended, either. Critical scientific reflection of the established standards and the contribution to their development are relevant apart from the substantive knowledge and practical exercise.
- Another focus is team-oriented project work with a focus on leadership, teams and people. Training is focused on the practical exercise of work in teams. The management of international, intercultural and interdisciplinary (3 x "i") teams is part of this programme, as is the scientific examination of the underlying sociological topics.
- The project environment and the achievement of the project are of high relevance for project management. Sustainable project management involves the environment and the project contents in the approach to management. Scope, time and budget usually influence quality. Further considerations include the field of sustainability and the stakeholder management. The Dortmund EuroMPM addresses the area of digital change (EuroMPM-IT) as the project organisation (EuroMPM-General), inter alia, through specialisations that adhere to international standards. The European partners enhance this specialisation.

Study abroad:

In all study programme variations, students have the opportunity to study block courses or a whole semester abroad at our partner universities:

- NTNU Trondheim: Master's in Project Management: https://www.ntnu.edu/studies/msproman
- Kiev National University of Construction and Architecture (KNUCA): http://www.knuba.edu.ua/eng/?page_id=645
- Ternopil National Economic University (TNEU): http://www.tneu.edu.ua/project-management/
- KTU Kaunas: https://fi.ktu.edu

The international educational concept has successfully been tested for several years in the ongoing study programmes of the European Master's in Project Management (EuroMPM), the Master's Embedded Systems for Mechatronics (ESM), and the Ruhr Master's school.

Course Details

Course organisation

EuroMPM-IT (unrestricted admission):
(Four-semester study programme with IT specialisation)
In the third semester, students may study their chosen specialisation at the university in the EuroMPM consortium that offers the chosen specialisation. The programme finishes with a Master’s thesis in the fourth semester.

**EuroMPM-General-3: (restricted admission)**
(Three-semester study programme with Business Administration / Project Management specialisation)
In the third semester, students have to choose one module of a specialisation/elective and have to write their Master’s theses.

**EuroMPM-General-4: (restricted admission)**
(Four-semester study programme with Business Administration / Project Management specialisation)
In the third semester, students have to study abroad at a partner university within the EuroMPM Consortium in Bilbao, Spain or Trondheim, Norway. They also can choose a university of their choice and have to conclude a learning agreement with our university. The study semester abroad can be substituted by an internship semester at home or abroad. Students have to write their Master’s theses in the fourth semester.

### Types of assessment

Assessment is partly (50%) based on students’ research results and the results of teamwork and presentations. Final written or oral exams are included in all courses (50%). The study course comprises 120 ECTS (EuroMPM-IT and EuroMPM-G4) or rather 90 ECTS (EuroMPM-G3) in total - 30 ECTS for each semester.

### A Diploma supplement will be issued

Yes

### International elements

- International guest lecturers
- Integrated study abroad unit(s)
- Language training provided
- Training in intercultural skills
- Courses are led with foreign partners

### Integrated study abroad unit(s)

Only mandatory for EuroMPM-General-4:
The third semester is a study semester abroad or an internship semester abroad or at home. Typically, participants spend the third semester of the programme at a university within the EuroMPM consortium.

### Integrated internships

Project managers from several companies such as Hella, Ericsson, RWE, DHL, etc., contribute to the programme, and students work on projects for such companies.

### Special promotion / funding of the programme

- DAAD
- ERASMUS+

### Name of DAAD funding programme

DAAD Strategic Partnerships

### Course-specific, integrated German language courses

Yes

### Course-specific, integrated English language courses

No

### The course of study can be

No

Requirements / Registration

**Academic Admission Requirements**

*For EuroMPM-IT:*

The course of study is designed as a continuation of a prior degree programme providing fundamental knowledge of both computer sciences and business administration. The following prerequisites are mandatory:

- successful completion of a diploma or Bachelor’s degree in business computing, business administration, or economics, with a specialisation in applied computer sciences from a university, polytechnic, or university of applied sciences, or a similarly accredited Bachelor’s degree course from a professional academy, OR
- successful completion of a diploma or Bachelor’s degree in a different subject similar to those mentioned above, from a university, polytechnic, or university of applied sciences, or from a similarly accredited Bachelor’s degree course of a professional academy
- The final grade must be at least “good” (2.3)
- A degree in a similar subject requires a curriculum that contained relevant competencies in business administration and/or project management and computer sciences on a
necessary scale and level.

For EuroMPM-General
The course is designed as a continuation of a prior degree course of study providing fundamental knowledge of business administration and project management.

The following prerequisites are mandatory:

- successful completion of a diploma or Bachelor’s degree in business computing, business administration, or economics, from a university, polytechnic, or university of applied sciences, or a similarly accredited Bachelor’s degree course from a professional academy, OR
- successful completion of a diploma or Bachelor’s degree in a different subject similar to those mentioned above, from a university, polytechnic, or university of applied sciences, or from a similarly accredited Bachelor’s degree course of a professional academy
- The final grade must be at least “good” (2.3).
- A degree in a similar subject requires a curriculum that contained relevant competencies in business administration and project management on a necessary scale and level.

Language requirements
Applicants must provide proof of their English skills:

- TOEFL iBT 90 points (Internet-based)
- TOEFL itp 550 points
- IETLS 6.5
- or equivalent

Certificates should not be older than two years.

Application deadline
Application deadline:

15 July for the following winter semester
(EU and non-EU applicants: Please check the website for application details specific to your citizenship.)

Pre-application process:

The course management offers an application pre-check of the relevant documents (Bachelor’s degree, Bachelor’s transcript, language certificate) for determination of eligibility according to our examination regulations. These documents can be sent in one merged PDF file to:

eurompm@fh-dortmund.de

A few weeks later, after the pre-check documents have been checked, applicants get the pre-check results by e-mail.

Application process:

We only accept online applications. The application platform for non-EU applicants opens on 1 April of each year and for EU applicants on 15 May of each year.

Submit application to
Only online application are allowed.
Please send all requests to:

   eurompm@fh-dortmund.de

Services
Suggestions on finding accommodations are available through the International Office’s website at https://www.fh-dortmund.de/en/stud/studierenden/englisch/io/studierende/International_Students.php. Students can also find accommodations on the private market. Rent for a single room in a student hall of residence is approx. 300 EUR.

Dortmund University of Applied Sciences and Arts does not have an internal accommodation office. It is the responsibility of each student to find her/his own accommodation.

Dortmund University of Applied Sciences—and Arts
Fachhochschule Dortmund – University of Applied Sciences and Arts: future-oriented with more than a 100-year-old history

It was officially founded in 1971, but the original institute, the “Königliche Werkmeisterschule für Maschinenbauer”, was established in 1890. Nevertheless, the fundamental concept has remained unchanged throughout the years: study and teaching geared towards practical problem-solving, taught by highly experienced professors, cementing the link between theory and practice. True to this philosophy, the university offers over 80 study options, in eight different faculties: applied social sciences, architecture, design, computer sciences, economics, mechanical engineering, information technology, and electrical engineering. More than 14,500 students are currently enrolled at Dortmund University of Applied Sciences and Arts. The world is changing – and a modern university is changing, too.

Intense research for the practice

Versatile, interdisciplinary and practical – this is the guiding principle for research at Dortmund University of Applied Sciences and Arts. Approximately 200 researchers work on projects in a wide range of subjects. Innovation is created by the interaction between science and economics, and it is thus not surprising that 95% of all research is in cooperation with external partners. This provides diverse benefits for our students. Our Vice Rector for Research, Development and Transfer, Prof Dr Andrea Kienle, believes that students who have worked in such research projects are particularly attractive as potential employees for private and public employers. With easy access to research facilities, Dortmund University of Applied Sciences and Arts is a very attractive partner for small and medium-sized businesses in Dortmund and the surrounding region. A network based on mutual exchange means mutual benefits for all concerned.

Internationality: engaged worldwide – welcoming guests from all over the world

From the university out into the world, and from the world to the university: this characterises international diversity at the Dortmund University of Applied Sciences and Arts. Irrespective of where our students come from, whether they come from Brazil, Cameroon, Cuba or Ukraine, they all help shape the international profile of Dortmund University of Applied Sciences and Arts. “The university thrives on the cultural variety of our students,” says Gisela Moser, lecturer for Student Services and International Affairs. The other side of internationality involves awakening potential. The goal is to motivate students to go abroad for at least one semester. By going abroad, students improve their language skills, develop intercultural competences and develop their own personalities.

Family-friendly university

We are committed to supporting both students and staff in achieving an equitable balance between studies, professional life and family life. This is not just a question of providing good and reliable childcare. It also involves finance as well as the organisation of study and work. With a help desk and central office, the family service supports and advises students and staff on such issues. The service can also provide help with arranging home care and study or business matters.
University Location

Go study in Dortmund

FH Dortmund University of Applied Sciences and Arts welcomes foreign students who want to come and study at the Faculty of Business Studies as degree-seeking students or exchange students who study here for one or two semesters.

The Faculty of Business Studies receives international students from all over the world. They usually come from partner institutions and follow a course of study agreed with their home institutions or participate in our international Master’s courses of study as degree-seeking students.

Foreign students have access to all campus facilities and are assisted by the International Office in all matters of enrolment, housing and visas. The following website contains general information for all incoming international students, from application forms to health insurance matters:

To find out what the city of Dortmund has to offer, see the following website for information and impressions of this dynamic city in the Ruhr area.
