Course Details

Course organisation

This three-year sandwich programme is aimed at young scientists from low- and middle-income countries. However, scientists who do not originate from low- and middle-income countries but have a focused interest in research on issues regarding low- and middle-income settings are also eligible. Candidates should already be incorporated in research activities, since a research topic and a local supervisor have to be presented at the time of application. In addition, the project has to be sufficiently funded. Two supervisors from Ludwig-Maximilians-Universität München (LMU) will then be matched accordingly.

PhD candidates will spend an initial module block of three months (October to December) at the LMU in Munich, Germany, going through different modules. Examples of these modules include the following: introductory modules (international health fundamentals and policy & politics), basic research topics, statistics, scientific management, methodology and research skills, etc.

Subsequently, research will be conducted in the PhD candidates' respective countries of origin. Contact between the PhD candidates, their local supervisor and the supervisors in Munich will be established through regular progress reports and web-based communication. The second module block lasts three months and will take place in Munich one year later, from January to March. Within this module block, PhD candidates have the possibility to select advanced modules based on their need and interest.

In the final period, the PhD candidates will develop drafts of their PhD thesis in collaboration with both their local and LMU Munich supervisors, finalised by thesis submission and defence of the thesis in Munich.

International elements	<ul style="list-style-type: none">• International guest lecturers• Integrated study abroad unit(s)• Training in intercultural skills• Projects with partners in Germany and abroad• International comparisons and thematic reference to the international context• Content-related regional focus
Integrated study abroad unit(s)	Research periods will take place in the PhD candidates' respective countries of research.
Integrated internships	None
Special promotion / funding of the programme	<ul style="list-style-type: none">• DAAD
Name of DAAD funding programme	"Exceed" - Higher Education Excellence in Development Cooperation
Course-specific, integrated German language courses	No
Course-specific, integrated English language courses	No

Costs / Funding

Tuition fees per semester in EUR	None
Semester contribution	Basic fee of 75 EUR + additional fee for the Deutschlandticket

Costs of living Living costs (including accommodation and health insurance) in Munich range from 1,000 to 1,500 EUR per month.

Funding opportunities within the university Yes

Description of the above-mentioned funding opportunities within the university Scholarships are available for selected candidates from low- and middle-income countries according to the DAC list. LMU Travel Grant, LMU Completion Grant.

Please have a look at the LMU website:<https://www.lmu.de/en/workspace-for-students/student-support-services/finance-your-studies/scholarships/scholarships-for-international-students/index.html>.

Requirements / Registration

Academic admission requirements Minimum requirements are either a university degree in medicine or a Master's degree in an appropriate health-related subject. As is customary in a programme with international candidates, fulfilment of entry requirements must be assessed individually.

Language requirements Proof of English proficiency is required (TOEFL minimum 550 or IELTS 6.0). Alternatively, diplomas of high school or university education with English as the major teaching language may be considered after individual assessment. If you are a native speaker, proof of English is not required.

Application deadline The application period for the PhD Medical Research - International Health programme is from 1 December until 31 January. Please check our website regularly:
