Joint degree / double degree programme	No
Description/content	The Supply Chain Management programme aims to provide an in-depth understanding of designing, maintaining and analysing supply chains as well as teach the skills necessary to apply methods and tools to successfully and responsibly work on and in supply chain networks.

The programme is designed for students of different professional (logistics, economics, engineering or information technology), geographical and cultural backgrounds. The programme seeks to expand the participants' competencies and capabilities to be prepared for all upcoming tasks and developments within increasingly digitalised supply chains.

The curriculum teaches modern leadership and management competencies with a strong emphasis on data analytics and data engineering. This includes the analysis of data-driven business processes.

Core components of the curriculum include:

- Supply Chain Management and Logistics
- Supply Chain Engineering
- Purchasing & Distribution
- Supply Chain Finance
- Advanced Project, Quality and Risk Management
- Big Data Challenge
- Programming in R and Python
- Programming Approaches for Data Analytics
- Business in Germany Today
- Ethics & Sustainable Business
- Communication and Presentation Skills

Students are introduced to working with and within companies and very quickly develop personality and professionalism through frequent, individual feedback sessions and personal attention. This facilitates and speeds up their career development and helps them to quickly become valuable assets in the workforce.

In addition, SCM students have the opportunity to prepare themselves for the German job market by participating in German language courses, courses about German culture and current topics, and other career services.

## Course Details

### Course organisation

The first semester is a foundational semester in which students from different educational and cultural backgrounds get acquainted with general methods and knowledge about supply chain and logistics, data analytics, and programming.

Modules of the first semester:

- Advanced Project Quality & Risk Management

## Services

### Possibility of finding part-time employment

We offer a limited number of student jobs on campus as well as support in finding student jobs off campus.

### Accommodation

Constructor University offers **on-campus** accommodation that includes room and board (full meal plan). This accommodation is offered to **undergraduate and International Foundation Year students**. The fee for one academic year (nine months) is 8,000 EUR.

Constructor University offers a variety of **off-campus** student housing options for **graduate students** in Bremen. You can reserve accommodation through Constructor University and take advantage of our housing support services, flexible lease terms, and full campus amenities. The fee for accommodation for one academic year (nine months) is 4,500 EUR.

Generally, the cost of housing in Bremen can be considered affordable compared to other German cities. Private rooms range from 300 to 500 EUR per month.

### Career advisory service

The Constructor University Career Services Center accompanies students through all stages of their

career development in order to enable them to become responsible leaders of tomorrow.

<https://constructor.university/student-life/career-services>

**Support for international students and doctoral candidates**

- Welcome event
- Specialist counselling
- Cultural and linguistic preparation
- Help with finding accommodation

**General services and support for international students and doctoral candidates**

As most of our students have an international background, we focus on your wellbeing.
