## MSc in Environmental and Resource Economics

Kiel University • Kiel

### Overview

Degree	Master of Science (MSc) in Environmental and Resource Economics
Teaching language	<ul style="list-style-type: none"><li>English</li></ul>
Languages	<p>All courses are held in English.</p> <p>Exception: If you choose your supplementary subject to be political science, these courses will be held exclusively in the German language. In German as foreign language, German is taught. No prior knowledge is needed.</p>
Full-time / part-time	<ul style="list-style-type: none"><li>full-time</li></ul>
Programme duration	4 semesters
Beginning	Winter and summer semester
Application deadline	<p>Application period with a <b>Bachelor's degree obtained in Germany</b> via <a href="#">Kiel University</a>:</p> <ul style="list-style-type: none"><li><b>1 June to 1 August</b> for the following <b>winter</b> semester (in the case of later applications, consideration for the following semester cannot be guaranteed)</li><li><b>1 December to 1 February</b> for the following <b>summer</b> semester (in the case of later applications, consideration for the following semester cannot be guaranteed)</li></ul> <p>Application period with a <b>Bachelor's degree obtained in other countries</b> via <a href="#">uni-assist</a>:</p> <ul style="list-style-type: none"><li><b>1 March to 15 July</b> for the following <b>winter</b> semester</li><li><b>1 November to 15 January</b> for the following <b>summer</b> semester</li></ul> <p>Effectively, formalities for foreign applicants normally require at least three more months, e.g. visa application, application for scholarships from the DAAD or elsewhere, etc.</p>
Tuition fees per semester in EUR	None
Combined Master's degree / PhD programme	No
Joint degree / double degree programme	No
Description/content	Environmental and Resource Economics addresses many interesting and pressing questions which are waiting to be solved: How to use the limited amount of resources available in a

sustainable and optimal way? How can we protect our environment without giving up the standard of living we have? What instruments are best suited to achieve, e.g. climate protection or a transition to renewable energy? What value do we assign to environmental goods and services? Analysing those problems and finding answers to those questions requires strong methodological knowledge, which you will learn and expand upon in this programme.

Apart from improving competence in applying analytical methods in the core subjects of environmental and resource economics, energy economics, microeconomics, economic dynamics as well as econometrics, the autonomous acquisition and adoption of important research methods during elective lectures and seminars in environmental and resource economics and other fields of economics is also a major focus of this programme. A wide range of specialised courses offered on a regular basis gives students insight into many areas of economic research arising through cooperation with the Kiel Institute for the World Economy.

Supplementary subjects either in political science (only offered in the German language) or in ecology and geography amplify the scientific focus. Additionally, the supplementary subject, German as a foreign language, is designed especially for international students with no knowledge of the German language until up to knowledge of level C1.

## Course Details

---

### Course organisation

The Master's programme is organised in six parts:

1. Compulsory Section in Economics (24 ECTS CP)
2. Compulsory Section in Environmental and Resource Economics (18 ECTS CP)
3. Compulsory Section in Econometrics (6 ECTS CP)
4. Compulsory Elective Section in Economics (30 - 54 ECTS CP)
5. Compulsory Elective Section Supplementary Subjects (0 - 18 ECTS CP)
6. Master's thesis (18 or 30 ECTS CP)

The core subjects of environmental and resource economics, microeconomics and economic dynamics as well as econometric methods are taught in the first two semesters. Modules from other economic research areas or from environmental and resource economics can be chosen to deepen the students specific knowledge.

There are two versions for the completion of the Master's thesis:

1. 30 ECTS: Six months processing time, or
2. 18 ECTS: 15 weeks processing time; two additional modules need to be completed

Examination regulations:

A wide range of specialised courses offered on a regular basis gives students an insight into many areas of economic research arising through cooperation with the [Kiel Institute for the World Economy](#).

For the study plan for the Master's programme in Environmental and Resource Economics, see below:

A Diploma supplement will be issued

Yes

International elements

- Language training provided

- International guest lecturers
- Integrated/optional study abroad unit(s)
- International comparisons and thematic reference to the international context

Integrated/optional study abroad unit(s)	Kiel University and the Department of Economics offer exchange programmes for spending a semester at a partner university abroad (ERASMUS and direct partnerships with universities worldwide). For students interested in such exchange programmes, we recommend going abroad in the third semester of the programme. The credits from the partner university can be transferred to the programme.
Course-specific, integrated German language courses	No
Course-specific, integrated English language courses	No

## Costs / Funding

Tuition fees per semester in EUR	None
Semester contribution	An <b>enrolment fee</b> ("Einschreibgebühr") of 55 EUR is charged for the first enrolment at Kiel University. A <b>semester contribution</b> ("Semesterbeitrag") currently amounting to 269 EUR must be paid each semester. This covers free public transport ("landesweites Semesterticket") for trains and buses in Schleswig-Holstein and Hamburg, reduced lunch prices, a culture ticket and other benefits for students.
Costs of living	<p>The monthly costs of living in Germany are currently at least 934 EUR per month. Please note that when applying for a visa (from countries requiring a visa) and also later in Germany when extending a residence permit, financial means in the amount of the living costs for one year (11,208 EUR) must be proven.</p> <p>More information can be found here: <a href="http://www.international.uni-kiel.de/en/incomings/planning-arrival-and-stay/visa">www.international.uni-kiel.de/en/incomings/planning-arrival-and-stay/visa</a>.</p>
Funding opportunities within the university	No

## Requirements / Registration

Academic admission requirements	<p>Applicants are expected to hold a <b>Bachelor's degree</b> or a comparable university degree (minimum grade 2.5) with a regular period of university education of three years or more and 180 ECTS credit points or more.</p> <p>In the <b>180 credit points</b>, the following needs to be included:</p> <ul style="list-style-type: none"> <li>• <b>35 credit points</b> from courses on <b>principles of economics</b> (i.e. courses on microeconomic theory and courses on macroeconomic theory) with no overlapping in substance and from courses on <b>quantitative methods</b> with no overlapping in substance of which at least: <ul style="list-style-type: none"> <li>◦ <b>10 credit points</b> from courses on <b>microeconomic theory</b></li> <li>◦ <b>5 credit points</b> from courses on <b>macroeconomic theory</b></li> <li>◦ <b>15 credit points</b> from courses on <b>quantitative methods</b> (analysis, algebra,</li> </ul> </li> </ul>
---------------------------------	---

statistics, and econometrics)

Applicants with a minimum overall grade of 3.0 may also be eligible for the Master's programme in Environmental and Resource Economics if the weighted average grade (weighted with the credit points) from courses in economics and on quantitative methods is at least 2.5.

With regards to content and comparability, an official module manual has to be submitted. In case of unavailability of an official manual, module descriptions approved by the offering institution of higher education are accepted. To avoid unnecessary paper piles, it is also allowed to provide a link to an official online handbook. The module manual needs to be provided either in German or English.

Admission requirements can be found here: <https://www.wiso.uni-kiel.de/en/study/misc/info-inst-econ/application> and here: <https://www.wiso.uni-kiel.de/en/study/master/environmental-resource>

We also provide an optional self-test for your own assessment of knowledge that is required in our Master's programmes. Further information can be found [here](#).

## Services

### Possibility of finding part-time employment

The Department of Economics and the Kiel Institute for the World Economy offer jobs as student assistants. Students can apply for these jobs upon availability.

#### Accommodation

Please find information on accommodation in Kiel on the following website: [www.international.uni-kiel.de/en/incomings/planning-arrival-and-stay/accomodation](http://www.international.uni-kiel.de/en/incomings/planning-arrival-and-stay/accomodation).

#### Career advisory service

Career counselling: <https://www.careercenter.uni-kiel.de/en/career-counselling>

Career Center seminars: <https://www.careercenter.uni-kiel.de/en/seminars>

#### Support for international students and doctoral candidates

- Welcome event
- Tutors
- Cultural and linguistic preparation

#### General services and support for international students and doctoral candidates

International students receive support from Kiel University's International Centre in manifold ways: [www.international.uni-kiel.de/en/about-the-international-center](http://www.international.uni-kiel.de/en/about-the-international-center)

## Kiel University Interfaces

Kiel University (CAU) uses research, teaching and the transfer of science to address the great challenges of our time in health, environmental and cultural change, technology and energy. In doing so, it ensures peace and preserves livelihoods for future generations.

Kiel University

© Marvin Radke – standbildtechniker.de

Kiel University (also referred to as the CAU) was founded in 1665. It is Schleswig-Holstein's oldest, largest and best-known university, with 27,000 students and 3,700 staff members. It is also the only full-fledged university in the state. Seven Nobel Prize winners have worked here. The CAU has been successfully taking part in the Excellence Initiative since 2006.

We use research, teaching and the transfer of science to address the great challenges of our time in health, environmental and cultural change, nutrition and energy. In doing so, we ensure peace and preserve livelihoods for future generations. We use responsible actions to make sure that scientific discoveries are transferred into all sectors of our society by interdisciplinary thought – regardless of short-lived trends – where they are incorporated into political, economic and social decisions aimed at securing peace and prosperity.

When it was founded back in 1665, the CAU had the motto “Pax Optima Rerum: peace is the most valuable asset.” This maxim is as applicable today as it was over 350 years ago. We want to follow this key idea and contribute towards creating a peaceful, fair world in which everyone lives freely and comfortably. We aim to create a world in which treating the environment with respect also enables future generations to enjoy the same benefits.

#### **CAU's mission:**

Our mission is to deliver research and teaching that contribute to peace, prosperity and maintaining a pluralistic, free society as well as address the challenges we are facing. Our strong disciplines carry out this mission. The fulfilment of this mission requires interdisciplinary collaboration and involves transdisciplinary issues. We find solutions to today's pressing problems and implement these solutions together with stakeholders from society, industry and politics.

#### **Teaching profile:**

We are dedicated to research-based teaching and learning. Therefore, the development of new teaching approaches is evolving constantly at the interfaces between research from the different scientific disciplines. Students from all over the world benefit from this: research results are quickly integrated into programme curricula and our academic staff is trained in state-of-the-art teaching methods.

#### **Research profile:**

The CAU is Schleswig-Holstein's only full-fledged university with a major focus on research. Over time, four dynamic priority research areas have systematically developed. These are based on strong disciplines interacting together – Marine Science, Life Science, Societal and Cultural Change, and Nano Surface and Interface Science. Each individual research area makes a substantial contribution towards dealing with at least one of the grand challenges of our time.

#### **Transfer profile:**

A university is not an island. It is an entity that impacts on, with and for society in a number of ways, by offering space for new ideas, passing on knowledge and values, and enabling debates about controversial subjects. Universities train specialists, produce innovative products and start-ups, help companies to develop further and assist politics by giving advice and warnings. The CAU encompasses top quality, innovative science, a sense of responsibility and the transfer of knowledge. We advocate for the university's active role in society and aim to work closely together with the community to be the driving force behind regional, national and international development by looking for and finding pioneering solutions for our most pressing issues. This is the reason why we maintain a variety of active connections with our partners in science, industry, politics and society.

## University location

The city of Kiel is located directly on the Baltic Sea coast and is the capital of the northernmost German federal state, Schleswig-Holstein. Famous for its sailing tradition, Kiel has hosted two Olympic sailing competitions. The city's annual "Kiel Week" is the world's largest sailing event and one of the biggest cultural festivals in northern Europe. Kiel's international flair is enhanced by its port, where Scandinavian ferries dock next to cruise liners and historic ships. Those who enjoy going out will benefit from the city's lively cultural life as well as the many clubs and bars to be found between the campus and the city centre. Kiel is a strong centre of science and research. Our students benefit from studying by the sea in a city that offers short distances and a wide range of leisure facilities by the waterside. It takes less than 20 minutes to get from the lecture hall to the beach. A fresh breeze on your face and the right books on hand create a great atmosphere for learning. The social conditions for studying in Kiel are excellent. Freshmen receive a welcome payment of 100 EUR when they come to Kiel to commence their undergraduate studies. They have the opportunity to live in one of the many halls of residence, which are reasonably priced and situated close to the universities. In our bicycle-friendly city, not only the universities but also other inner-city locations can be reached conveniently by bike. The new scientific generation represents the most important resource for making Kiel, the state capital, fit for the future.
