Target group	Bachelor's students and Master's students as well as young professionals and scientists who have an interest in company analysis and valuation
Description/content	This course aims at making you familiar with the financial statements and financial statement analysis of firms by enabling you to read and analyse them to your professional benefit. Hence, you will learn to consume, analyse and forecast financial statements. Adopting a user perspective, we move beyond the technical aspects of financial reporting and preparing accounts. Instead, based on these fundamentals, you will be able to understand the past business activities of a firm through the lens of financial statements. The course seeks to enable you to forecast the future business activities of a firm and to conduct a sound fundamental equity valuation to challenge market prices of real-world companies.
