Joint degree / double degree programme	No
Description/content	<p>The Master's in Economics at the University of Cologne offers a research-oriented study programme with courses from a wide range of economic areas. As a student, you are largely free to choose the subjects you intend to concentrate on, and you can opt to focus on different areas within and between fields. The main topics are:</p> <ul style="list-style-type: none">Market Design and BehaviourMarkets and Economic PolicyEmpirical Methods and Data AnalysisEnergy and Climate Change <p>The empirical and analytical focus of the programme enables you to analyse economic phenomena using state-of-the-art research methods and to carry out research projects. Upon graduating from the programme, you will be prepared to enter a professional career in many private and public institutions in need of economic expertise. You may also opt for the continuation of your studies through a PhD programme in economic research.</p> <p>The majority of the MSc Economics programme is internationally oriented in both content and</p>

style. It provides an international study environment in Germany, with a high proportion of international students from diverse backgrounds enrolling into the programme. Furthermore, many members of our faculty have an international background, either coming from or having been trained abroad.

Course Details

Course organisation

The Master's programme carries 120 ECTS credits and comprises a Core Section, a Specialisation Section, Supplementary Sections and the Master's thesis. It equips you with knowledge of the theoretical foundations and methods and the ability to conduct applied and theoretical economic analyses. Apart from the Core Section, you will be able to flexibly choose your course curriculum largely following your individual preferences.

The **Core Section** of the programme contains 24 credit points (four courses) and will introduce you to the central methods and insights of the main areas of modern economics: econometrics and statistics, macroeconomics and microeconomics.

In the **Specialisation Section**, you will choose courses from the main areas that reflect your substantive orientation in which you want to proceed with your studies.

In the specialisation on **Empirical Methods and Data Analysis**, your focus will be on the tools of empirical analysis. In **Markets and Economic Policy**, your focus will primarily be on issues of public policy and the functioning of markets from a macroeconomic perspective. In **Market Design and Behaviour**, you will focus on the microeconomic working of specific markets and how they should be regulated and the behaviour of individuals in them.

The **Supplementary Section in Economics** offers both specialisation and generalisation. A particular concentration on energy markets and climate economics is possible in our specialised field in Energy and Climate Change, which builds on and deepens methods and insights from various areas of the specialisation section. You may also acquire particular skills of our interest by choosing further courses from any of the fields in the specialisation section. You can also complement and deepen your studies with courses from our [Master in Economic Research programme](#).

The **Supplementary Section in Management and Social Science** allows you venture into other fields within the faculty, for example, complementing the study of labour markets with courses in "Personnel Economics" and deepening your understanding of public policy with expertise from political science or your understanding of human behaviour in sociology.

With the **Master's thesis**, you will show your ability to apply the skills you have acquired throughout the programme and conduct your very own research with an aim to contribute to scientific knowledge.
