Doctorate

Focus on Atherosclerosis - CRC1123

Ludwig-Maximilians-Universität München • München

Overview

Degree	PhD "Medical Research", Dr rer nat, Dr rer biol hum, Dr med
Course location	München
Teaching language	<ul style="list-style-type: none">English
Languages	Courses and lectures are held in English.
Programme duration	6 semesters
Beginning	Only for doctoral programmes: any time
Application deadline	Open application rounds: <ul style="list-style-type: none">1 December - 31 January1 June - 15 July <p>Link will be available on our website:https://www.sfb1123.med.uni-muenchen.de/graduate-program/application/index.html</p>
Tuition fees per semester in EUR	None
Combined Master's degree / PhD programme	No
Joint degree / double degree programme	No
Description/content	<p>The main focus of the Collaborative Research Centre (CRC) 1123 Atherosclerosis – Mechanisms and Networks of Novel Therapeutic Targets is to study in depth the molecular networks in atherogenesis, atheroprogession and atherothrombosis as the pathological sequence underlying coronary artery disease, in order to identify and verify novel targets for treating atherosclerosis. With this aim in mind, our CRC brings together researchers of different disciplines, institutions, and universities in Munich.</p> <p>Within this interdisciplinary research, doctoral researchers enrolled in our CRC programme will be offered a three-year structured PhD programme, allowing the students to collect the necessary European Credit Transfer System (ECTS) points to obtain their PhD in Medical Research. MD students are welcome to join the study programme for the duration of their medical thesis research projects in the lab.</p> <p>The fundamental goal of our qualification programme is to provide training specifically tailored to the needs and topic of our CRC. The training programme consists of the following:</p>

- Basic principle seminars focusing on atherosclerosis and related innate and adaptive immunity
- Advanced methodological courses with an emphasis on in vivo assays, animal models and state-of-the-art imaging tools
- Soft skills seminars on communication, presentation and other topics equally relevant for achieving success in both a scientific career and a non-scientific career
- Scientific education provided by lecture series (by national and international renowned speakers in the field), annual retreats, workshops and an international summer school

A thesis advisory committee is assigned to each PhD student. This committee supervises the scientific work, its feasibility and its milestones. The committee also advises the student in his/her career planning and the cultivation of a scientific network.

Additional support is offered by the [GraduateCenter](#).

Course Details

Course organisation	<p>The three-year programme consists of the following:</p> <p>A. Lecture series (one-time 45-60 minutes)</p> <p>B. Basic Principles seminars (one-time 45-60 minutes) and respective Advanced Method courses (hands-on; one- to two-day courses) such as:</p> <ul style="list-style-type: none"> • Static and perfusion-based ex vivo adhesion and migration assays • Imaging leukocyte recruitment in vivo – introduction to intravital microscopy • Models of plaque destabilisation • Atherothrombosis models • Confocal and STED microscopy • Whole mounted organ imaging using two-photon laser scanning microscopy • Laser microdissection and gene expression analysis of isolated plaque cells • Advanced flow cytometry methods • In vitro assessment of intracellular signalling, protein interaction and metabolism • Big data analysis <p>C. Soft skills</p> <p>D. Annual retreat</p> <p>E. Thesis advisory committee</p> <p>F. Organisation of lecture series and meetings</p>
----------------------------	---

A Diploma supplement will be issued	Yes
--	-----

International elements	<ul style="list-style-type: none"> • Courses are led with foreign partners
-------------------------------	---

Teaching/work obligations or opportunities	Teaching is not mandatory, but teaching opportunities can be offered upon request.
---	--

Course-specific, integrated German language courses	No
--	----

Course-specific, integrated English language courses	No
