Target group	Learners of German who are either working in technical, engineering, or natural science-oriented professions or who are studying or plan to study a related subject
Description/content	<p>This German language course is intended for participants from technical and science-oriented professions and degree courses. Technical terms frequently used in industry, engineering and science as well as useful phrases and grammatical structures will be practised with the help of authentic reading and listening comprehension tasks. Through discussions, simulations and a compilation of subject-relevant texts, for example, reports, essays and e-mails, students will improve their spoken and written German. The lessons follow the aims of communicative competence of the Common European Framework of Reference for Languages (CEFR) in an entertaining and inspiring way and will assist your independent learning process. The language course takes place from Monday to Friday in the mornings. There are four teaching units each morning (45 minutes each).</p> <p>In the afternoon, you can choose from seminars on different current issues in the areas of cultural and social sciences, e.g. history, literature, film, environment, European policy and interculturality.</p> <p>A graded certificate will be issued to all participants at the end of the course. It will include your individual language level according to the CEFR as well as your ECTS credits.</p>
