Master's degree

Overview

Degree	Master of Science
Teaching language	<ul style="list-style-type: none">English
Languages	All obligatory modules are taught in English. However, some electives are available in German only. Participants can choose to write the Master's thesis in either language.
Programme duration	4 semesters
Beginning	Winter and summer semester
Additional information on beginning, duration and mode of study	<p>We highly recommend the start of the programme in the winter semester. Although a start in the summer semester is possible, the programme is optimised for a start in the winter semester.</p> <p>Admission is generally valid for two subsequent semesters. Applicants from countries requiring a visa for entering Germany should consider applying until 15 January for beginning their studies in winter semester of the same year, giving them more time to complete the visa process and to prepare their stay.</p>
Application deadline	<p>Non-EU citizens:</p> <ul style="list-style-type: none">15 January 2024 for the summer semester 2024 (admission also valid for the winter semester 2024/25)31 May 2024 for the winter semester 2024/25 (admission also valid for the summer semester 2025) <p>EU citizens:</p> <ul style="list-style-type: none">15 January 2024 for the summer semester 2024 (admission also valid for the winter semester 2024/25)15 July 2024 for the winter semester 2024/25 (admission also valid for the summer semester 2025) <p>Applicants with a BA or MA degree from a German university:</p> <ul style="list-style-type: none">15 March 2024 for the summer semester 2024 (admission also valid for the winter semester 2024/25)15 September 2024 for the winter semester 2024/25 (admission also valid for the summer semester 2025)

Recommended start of the programme: winter semester

Tuition fees per semester in EUR	None
Combined Master's degree / PhD programme	No
Joint degree / double degree programme	No
Description/content	<p>MSc in Geoinformatics</p> <p>Trier University's Master's programme in Geoinformatics is a study programme conducted by the Faculty of Regional and Environmental Science, in cooperation with the faculties of Mathematics, Computer Science and Business Informatics. It is coordinated by the Environmental Remote Sensing and Geoinformatics lab and Spatial Data Sciences lab, and focuses on the combined use of quantitative remote sensing methods with GIS techniques to develop advanced mapping approaches for environmental observation and monitoring.</p> <p>Graduate Programme</p> <p>Trier University's MSc programme in Geoinformatics especially focuses on the application of geospatial technologies, remote sensing methods and visualisation technologies.</p> <p>The Master's degree in Geoinformatics requires 120 ECTS credit points, which corresponds to 16 to 18 graduate course units. These consist of ten required core courses and six to eight electives. The elective courses allow students flexibility in taking courses that will best help them meet their objectives and strengthen areas that they would like to focus on (e.g., remote sensing methods, survey statistics, or database technologies). The final requirement for a Master's degree in Geoinformatics is the successful completion and defence of a scientific Master's project.</p> <p>The Master's programme in Geoinformatics is designed for students who have obtained a Bachelor's degree in Geoinformatics or a related field. The programme is aimed at providing and facilitating the development of advanced methodological and computational skills. With the skills received from the programme, students will have the knowledge to obtain jobs in the public and private sector, consultant agencies, insurance companies and more. The successful alumni will be qualified to continue their education in national or international PhD programmes. The Master's degree also entitles them to follow a scientific career in universities and research institutions.</p>

Course Details

Course organisation	<p>This design of the study programme allows full-time students to complete the programme in four semesters.</p> <p>Compulsory Core Courses</p> <p>The obligatory courses include ten core courses covering the fundamental technologies and skills. The courses consist of lectures, lab exercises and seminars. An additional unit is devoted to facilitation the completion of the final Master's project.</p> <p>The ten compulsory courses (80 ECTS credit points) are as follows:</p> <ul style="list-style-type: none">• GIS – Application Development (Computer Programming for GIS)• Multivariate Statistics• Environmental System Analysis• Fundamentals of Environmental Remote Sensing• Numerical Mathematics for Geoscientists• Introduction to 3D Visualisation
---------------------	---

- Project studies on 3D Visualisation and Augmented Reality
- Geostatistics
- Pattern Recognition in Long-Term Global Satellite Archives
- Final Master's Thesis Project

Elective Courses (six to eight required)

The elective part of the programme of study comprises 40 ECTS credit points. Students can tailor their programme to suit their individual interests, choosing from a wide selection of 19 elective courses.

Environmental Remote Sensing and Geoinformatics lab

- Advanced Remote Sensing Data Processing and Interpretation
- Ecosystem Remote Sensing and Modelling
- LiDAR Remote Sensing for Environmental Observation and Monitoring
- Remote Sensing of Global Change Processes
- Raster data processing and image enhancement techniques
- 3D Data Acquisition and Introduction to Photogrammetry
- Advanced GIS

Geoinformatics - Spatial Data Science lab

- Geovisualisation
- Cartographic Communication

Faculty of Computer Science and Business Informatics

- Database Systems (in German)
- Fundamentals of Computer Graphics (in German)
- Data Mining and Web Mining (in German)
- Computational Geometry (in German)
- File Systems and Database Implementation (in German)
- Elements of Computer Science

Faculty of Economic and Social Statistics

- Survey Sampling
- Monte Carlo Simulation Methods

Governance & Sustainability lab

- Global Climate Change and Energy Resources
- Socio-hydrology

Faculty of Physical Geography

- Academic Research Skills (in German)

Off-Campus Training

- Internship

» [PDF Download](#)

A Diploma supplement will be issued	Yes
International elements	<ul style="list-style-type: none"> • Study trips
Integrated internships	Internships during the Master's programme are not planned unless you opt for the off-campus training as an elective course.

Course-specific, integrated German language courses No

Course-specific, integrated English language courses No

Costs / Funding

Tuition fees per semester in EUR None

Semester contribution Trier University does not charge tuition fees. Students only have to pay a semester contribution of approx. 300 EUR for the first semester and 285 EUR from the second semester onwards. This includes a semester ticket covering public transport in Trier and the Trier region. The fee acts as a contribution that benefits Trier Student Services ("Studierendenwerk Trier") and the student union. It also enables students to buy meals at reduced prices at the university's canteens.

Costs of living Students should expect expenses of approx. 900–1,000 EUR per month. For instance, monthly housing costs are approx. 290 to 400 EUR (in a students' dormitory or a room in a shared flat) and 450 to 650 EUR (for a single apartment on the private market). A meal in the student cafeteria costs approx. 3 to 5 EUR.

Funding opportunities within the university Yes

Description of the above-mentioned funding opportunities within the university Trier University offers some funding opportunities for international students in the final stage of their degree programmes (maximum duration: six months). However, there are no funding opportunities within the university for the whole course of study or the first three semesters of the programme.

Requirements / Registration

Academic admission requirements The Master's programme in Geoinformatics is designed for students who have obtained one of the following:

- a Bachelor's degree in Geoinformatics or
- a Bachelor's degree in a related field, for example: Bachelor's degree in environmental sciences or similar

Applicants must submit the following:

- personal statement / motivation letter
- CV

Language requirements Applicants must prove their English language proficiency level C1, based on the Common European Framework through one of the following tests. The test must have been taken within the last three years:

- TOEFL (Code 9208): at least 215 points (computer-based) or 550 points (paper-based) or 80 points (Internet-based)

- Cambridge English: Advanced (CAE) / C1 Advanced
- IELTS (at least 6.5 points)
- UNiCert III

Equivalent to one of the tests is proof of:

- being a native speaker
- two years of full time study in an English-taught programme, in an English-speaking country and undertaken within the past two years
- at least five school years of English in secondary education and at least five points in English at "Abitur" level (only Germany and Luxembourg)

Application deadline

Non-EU citizens:

- 15 January 2024 for the summer semester 2024 (admission also valid for the winter semester 2024/25)
- 31 May 2024 for the winter semester 2024/25 (admission also valid for the summer semester 2025)

EU citizens:

- 15 January 2024 for the summer semester 2024 (admission also valid for the winter semester 2024/25)
- 15 July 2024 for the winter semester 2024/25 (admission also valid for the summer semester 2025)

Applicants with a BA or MA degree from a German university:

- 15 March 2024 for the summer semester 2024 (admission also valid for the winter semester 2024/25)
- 15 September 2024 for the winter semester 2024/25 (admission also valid for the summer semester 2025)

Recommended start of the programme: winter semester

Submit application to

Please apply directly via Trier University's online application portal (PORTA): www.bewerbung.uni-trier.de

Services

Possibility of finding part-time employment

Students from the European Union, Iceland, Liechtenstein, Norway and Switzerland enjoy unrestricted access to the German labour market. International students from other countries are allowed to work 120 full days or 240 half days per year.

The Career Service of Trier University and the "Agentur für Arbeit" provide an online database for student jobs. Jobs offers can also be found on the website of the "Bundesagentur für Arbeit": <https://jobboerse.arbeitsagentur.de>.

Additionally, some temporary student jobs can be found on the university's bulletin boards. However, many job offers will require at least some knowledge of German.

Accommodation

Accommodation is available in student halls of residence through the Student Services Office (Studierendenwerk Trier: <http://www.studiwerk.de>) or on the private market (e.g. <http://www.hunderttausend.de>). Monthly housing costs are approx. 280 to 400 EUR (for a basic dorm room with a shared bathroom) and 450 to 650 EUR (for a single apartment on the private market).

Career advisory service

Trier University's career service offers a broad range of advisory services, seminars and events to assist students with planning their career: www.career-service.uni-trier.de

Additionally, Trier University's International Office offers a programme specifically targeted at international students: www.career-international.de

Support for international students and doctoral candidates

- Welcome event
- Buddy programme
- Tutors
- Specialist counselling
- Visa matters

Trier University

Trier University was founded in 1473, and it reopened in 1970 as a modern campus university. Built on a high plateau overlooking the Moselle River and surrounded by luscious green nature, it is said to be one of Germany's most beautiful campuses. Faculty and departmental buildings are connected by bridges and grouped around the forum and the central library. Trier University has a strong focus on the humanities, social sciences, and economics, but it is also steadily strengthening its environmental science programmes. There are six faculties that together cover more than 30 subject areas. Many research projects are interdisciplinary in nature and embedded in global networks.

With its roughly 1,200 employees and 11,000 students (including about 12% international students), Trier University embraces contrast: young yet true to tradition, internationally oriented yet regionally rooted, and at the geographic edge of Germany but in the heart of Europe.

<http://www.uni-trier.de>

University location

Trier is situated in the western part of the federal state of Rhineland-Palatinate in the Moselle Valley. The city is proud of its rich history, which is reflected in its museums and its many historical sites. Thanks to its landmarks, the Porta Nigra, the Trier Cathedral, and other significant architectural monuments, Germany's oldest city was declared a UNESCO World Cultural Heritage Site.

Today's cityscape is a fusion of history and modern lifestyle, not least characterised by a vibrant student life. With bars, cafés, and a colourful range of cultural offerings and festivals, Trier is a tourist attraction with international appeal and a beautiful place for the city's 110,000 residents to live.

The economy of the city is characterised by a few major enterprises and many medium-sized businesses. Trier is in the heart of Europe, as evidenced by its proximity to Luxembourg, which is an important financial centre and the site of several EU institutions, as well as its proximity to France and Belgium. Nine twin towns and cities across Europe, Asia, and the USA attest to Trier's international orientation.
