Varied

Additional information on tuition fees

There is a 1,500 EUR tuition fee per semester for non-EU citizens.

Students with a European Union citizenship do not pay tuition fees.

Joint degree / double degree programme

Yes

Description/content

Digitalisation is the biggest growth market worldwide – waiting for young talents to shape it! The "International Business Information Systems" Bachelor's programme delivers know-how and key qualifications in digital business, computer science, data science and artificial intelligence for the 21st century.

Professors with extensive management and research experience teach applicable knowledge and methods to prepare students for careers in business management and consulting.

Four qualities make this programme and faculty unique:

- It is the only accredited Bachelor's programme in Germany in the field of Business Information Systems taught 100 percent in English, combining digital business management with computer science and data science.
- It is the first faculty in Germany that founded Business Information Systems (in 1971).
- It is the only faculty in Germany and the first faculty worldwide that teaches and certifies students to become experts in Efficient Resource Planning (ERP) on its own SAP system.
- The faculty has some of the best hardware and software equipment in Germany to teach and train students in data science, big data analysis and eCommerce (eShop Design).

Students benefit from dedicated mentoring and individual talent-based career development plans, combined with the faculty's excellent reputation and professors with management experience, helping them to achieve outstanding career perspectives worldwide.

The Business Information Systems degree programme teaches the theory and practice of business administration in combination with computer science.

Examples of topics students learn during the first three semesters include the following:

- Business Management & Financial Accounting
- Programming Fundamentals
- IT Systems & Network Architectures
- Databases, Applied Mathematics & Statistics
- Digital Marketing & eCommerce

With these fundamentals, students in advanced semesters learn to:

- collect, store and secure data for business strategy and decision-making
- analyse big data for business intelligence reports and controlling
- understand business processes to plan the efficient use of company resources
- configure and apply information technology (IT) to solve and optimise tasks in production, logistics, marketing, and revenue management

Work-based learning right from the start: Professors and industry managers work with students on case studies and hands-on exercises, providing first-hand insight into current topics.

Excellent career perspectives:

- 85 percent of the faculty's international students get a full-time job and stay in Germany.
- Students can meet representatives from more than 90 different companies at the university's career fair twice a year.
- After only one and a half years of study, students have their first opportunity to earn money and carry out IT-related work during an internship.

Choose the best possible start for your business career in Germany and internationally!

Course Details

Course organisation

The **unique** International Business Information Systems Bachelor's degree programme at Furtwangen University educates students in **three fields of competence**:

- **Digital Business Management** (digital business models and strategies, agile project management, digital marketing, e-commerce, e-shop design, process analysis, robotic process automation)
- **Computer Science** (programming in Python and Java, data structures and algorithms, software development, web programming, computer security)
- **Data Science and Artificial Intelligence** (data bases, business intelligence reporting, big data analysis, deep learning, natural language processing, image processing, machine learning)

The study programme is designed to take **seven semesters (three and a half years)**.

- Each six-month semester consists of lectures and a three-week exam period followed by a break of several weeks.
- The teaching language is English. German language courses at the university are available at no extra charge.

In the first three semesters, students take foundation courses and learn the fundamentals of business management and computer science.☒

In the fourth semester, students gain practical experience in a paid internship. They spend six months in a company, during which they apply the theoretical knowledge and skills learned.

In the final three semesters, students take advanced courses. Five elective courses may be chosen to acquire deeper knowledge of special subjects of individual interest. Electives can be taken, for example, in app development and advanced programming, performance marketing, data analytics or logistics & digital supply chain management. Elective courses may also be taken at a partner university abroad.

The study programme is completed with the Bachelor's thesis in the seventh semester.

- The thesis is dedicated to research in a topic of the student's special interest.
- Students are prepared for the thesis by a dedicated course in scientific working, research methods and academic writing.
- The Bachelor's thesis may be carried out in cooperation with a company to develop a solution for a real-life task.
- A successful thesis carried out in cooperation with a company at the end of a study programme is an advantage for our students, as it might be easier to gain full-time employment in the company afterwards.

Hands-on exercise with technical systems and applied methods in state-of-the-art laboratories are an essential part of the practically-oriented study programme. Students train their skills in various case studies, business projects and software projects.

The study programme can be absolved **100 percent in English** – or 33 percent in German in order to achieve a **bilingual degree** with the German language level of C1. **German language courses** are available free of charge for enrolled students at the university campus in Furtwangen.

A Diploma supplement will be issued	Yes
International elements	<ul style="list-style-type: none"> • Integrated study abroad unit(s) • Language training provided • Training in intercultural skills • International guest lecturers • Projects with partners in Germany and abroad
Integrated study abroad unit(s)	<p>Double degree: In the fifth, sixth or seventh semester, students may study two semesters abroad at a partner university to achieve a double degree and a permission to live and work in the country—such as the EIT Eastern Institute of Technology, New Zealand.</p> <p>Study abroad semester: In the third, fifth, sixth or seventh semester, students may study one semester abroad as free movers or at one of the 30 cooperating partner universities worldwide.</p> <p>Various elective courses may be taken in English at a partner university abroad. The Faculty of Business Information Systems cooperates with leading universities worldwide, such as:</p> <ul style="list-style-type: none"> • Korea Advanced Institute of Science and Technology – Korea • University of Economics, Prague – Czech Republic • Pontificia Universidade Catolica do Rio de Janeiro – Brazil <p>The chosen and successfully passed elective courses at the partner university abroad are credited to the student once he/she returns to Furtwangen University (according to ECTS = European Credit Transfer and Accumulation System).</p>
Integrated internships	<p>In the fourth or fifth semester, students gain practical hands-on experience in a paid internship.</p> <ul style="list-style-type: none"> • Students spend six months in a company, during which they apply the theoretical knowledge and skills learned in the first three semesters of the study programme. • Students apply and select a company of their choice. Already in their first semester, students are trained by the faculty in the methods and skills needed to successfully apply for a part-time job, an internship, a thesis job and later a full-time job. <p>Additionally, the Bachelor's thesis may be carried out in cooperation with a company to develop a solution for a real-life task.</p>
Special promotion / funding of the programme	<ul style="list-style-type: none"> • DAAD • ERASMUS+ • Other (e.g. state level)
Name of DAAD funding programme	DAAD HAW International
Course-specific, integrated German language courses	Yes
Course-specific, integrated English language courses	No

- Copy of high school certificate with grade report
- Copy of certificates of successfully studied semesters at university or college with grade report
- Curriculum Vitae (CV)

Services

Possibility of finding part-time employment

65% of students in the Business Information Systems department have a **part-time job**, working two days a week.

- Students can get in contact with more than 90 regional and international companies at a **job fair** organised by Furtwangen University at the campus twice a year.
- Enrolled students find hundreds of available part-time jobs, internships, thesis jobs and full-time jobs at the **job portal** of Furtwangen University.
- **Student Support Manager** supplies enrolled students regularly with **current offers for part-time jobs** at regional companies.
- **Hybrid mode of lectures** in presence and simultaneously online supports the students' **flexibility and mobility** to manage a part-time job.

Enrolled students who learn to speak fluent German (B2) may apply for a **Cooperative Trainee Programme**. This is a paid traineeship integrated in the study programme. Students participating in this programme earn approx. 850 EUR per month and work only during lecture-free periods, and they also work in the fourth and seventh semester while working on their theses in cooperation with the company.

For further information, please contact the director of the international study programme: [pavel.rawe\(at\)hs-furtwangen.de](mailto:pavel.rawe(at)hs-furtwangen.de).

Accommodation

The cost of accommodation in a shared student apartment in Furtwangen start at approx **195 EUR** per month.

There is a variety of available student accommodation facilities for 230 EUR. Furtwangen has the lowest cost of accommodation in Germany.

The student support manager at Business Information Systems has prepared a **directory** of accommodation facilities for enrolled students in Furtwangen.

Career advisory service

Felix H.
MSc, BSc

Furtwangen University offers an excellent, multidisciplinary education and enjoys an excellent reputation in industry. Furtwangen University is an ideal starting point for a study abroad semester or a Master's programme abroad. I graduated from the Information Systems programme in Furtwangen, studied abroad in the US and Hong Kong and did my Master's in Management Science & Engineering at Stanford University in the United States.

Furtwangen University

Faculty of Business Information Systems at Furtwangen University Germany

© Prof Dr Pavel Rawe

Furtwangen University of Applied Sciences is a leading, state-run university of applied sciences in the south-west of Germany. The university was founded in 1850 and has nine departments and offers 50+ fully accredited degree programmes, mainly in the fields of technology, health, and business. The excellent facilities include modern lecture halls, an outstanding IT infrastructure, cutting-edge laboratories, and one of the best academic libraries in Germany.

In the **International Student Barometer**, Furtwangen University was ranked one of the best universities in Germany in the following areas:

- Study programme organisation (second place)
- Quality of lectures (third place)
- Class size and learning support by professors (third place)
- Support through buddy programme (third place)
- Internationally oriented lectures (third place) and
- Host culture (second place).

Benefit from the welcoming culture of Furtwangen University!

University location

Furtwangen is a **safe, friendly and peaceful** town with 9,000 inhabitants and 3,500 students. The town benefits from a healthy climate being situated in the heart of the beautiful Black Forest surrounded by lakes, mountains and ski resorts. Furtwangen has the advantage of low costs of living and a high level of employment thanks to the many successful companies located in the area. Both France and Switzerland are within driving distance by car or public bus and train. It is the ideal place to enjoy the great outdoors and to explore the culture that the nearby cities of Freiburg, Heidelberg, Baden-Baden, Stuttgart, Strasbourg, Basel or Zurich have to offer.

Furtwangen is located in one of the most prosperous states in Germany (**Baden-Württemberg**). This is the state with the highest level of research and development, an employment rate of 97 percent (2018) and many well-known international companies such as Daimler, Porsche, Bosch, Siemens, Hugo Boss and SAP. This innovative, highly industrialised region is one of the "Four Motors of Europe". Additionally, it is the most popular destination for immigrants to Germany; in 2013, 28 percent of the population had a migrant background.

The unique Bachelor's programme **International Business Information Systems (IBS)** is the only one at Furtwangen University **conducted in hybrid form: students can attend the lectures online** in real-time and interactive form. This is a great advantage for IBS students supporting their **flexibility and mobility** as they may **live and work (part-time job, working student job) across Germany** in cities such as Berlin, Stuttgart, Karlsruhe, Mannheim or Freiburg.
