Combined Master's degree / PhD programme	No
Joint degree / double degree programme	No
Description/content	<p>The Master's programme in Professional IT Business and Digitalisation provides in-depth knowledge in the field of enterprise information technology. It is aimed at people already working in the IT field as well as graduates of computer science, information technology, applied informatics and similar disciplines.</p> <p>The programme content has a high level of relevance to practice. Students learn to analyse and</p>

evaluate corporate landscapes as well as to plan and implement their repositioning in leading professional roles.

Students acquire sound knowledge of the following areas:

- Central topics of data-driven innovation such as generating and collecting data (Internet of Things, Mobile Computing)
- Analysis and modelling of data (Data Science) and development of infrastructure for storage, availability and application development and operation (Cloud Computing)
- Core entrepreneurial areas of IT, such as management of IT projects, IT Controlling, IT Security, Requirements Engineering and Enterprise Architecture Management

In addition to practical implementation of a project in the corporate context, particular emphasis is placed on social skills, especially in the areas of intercultural communication, leadership and sales.

---

## Services

---

**Possibility of finding part-time employment**

It is possible to work during the programme, but as it is a full-time programme, we recommend an upper limit of approx. eight to twelve hours of work per week during the lecture period.

**Accommodation**

Accommodation is available through the Studentenwerk Berlin or on the private market. You will find more detailed information right here: <http://www.htw-berlin.de/en/studies/organising-your-studies/financing-your-studies/living-in-berlin/>.

**Career advisory service**

The Career Services department of HTW Berlin supports and advises students during their transition from studying to employment.

**Support for international students and doctoral candidates**

- Welcome event
- Visa matters
- Cultural and linguistic preparation

**Supervisor-student ratio**

1:25

## #HTWelcome – corporate video

Practical orientation: this is what HTW Berlin stands for as a university of applied sciences. You can also see this in our promotional film. We study, teach and conduct research in the fields of business, engineering, computer science, design and culture. Our focus is always on applicability and topicality.

– HTW Berlin University of Applied Sciences –

© Hochschule für Technik und Wirtschaft Berlin

HTW Berlin is synonymous with first-rate study programmes, highly qualified graduates and practice-oriented research. As the largest university of applied sciences in the German capital, HTW Berlin benefits from a unique level of interdisciplinary cooperation thanks to its diverse range of study programmes. Covering the fields of technology, computing, business, law, culture and design, research carried out at the university makes an important scientific contribution to technical, economic, and social development. The HTW Berlin encourages research and development projects as well as innovative education and cultural programmes. Topics focusing on the information society are dealt with as well as energy-related issues and environmental problems. Whereas some business-related research concentrates on promoting entrepreneurial start-ups and improving the competitiveness of small and medium-sized enterprises, other research addresses social economics and political issues such as European and national labour market policies or the effects of globalisation.

## University location

HTW is located in one of the most interesting and multifaceted capitals in the world. With its multicultural and international flair, high living standards, affordable living costs and its offer of a broad range of free time activities (many city parks, concert halls, theatres, museums, galleries, etc.), Berlin attracts students from all over the world who come to study, live and work here.

Berlin is also the start-up capital in Germany and the EU. Recently, big and well-known companies such as Tesla tend to relocate their headquarters to Berlin or nearby, which offers excellent perspectives for HTW graduates.
