Joint degree / double degree	No

Description/content

The Master's degree programme in Social Design and Sustainable Innovation is about shaping the real and digital world with the aim of participating in eco-social change for the good. The cornerstones of the programme are social design, socially engaged art, sustainable fashion, digital innovation, critical theory and design practice. Within these key disciplines, students work on social innovations and interventions for a sustainable future. They choose between the following design specialisations: communication design, film, photography or web development.

Students use their individual academic background as well as knowledge and experience from other fields such as entrepreneurship and civic engagement, technology and crafts as resources for new ideas and debates on social and technological change.

In their projects with real-world partners, students design effective solutions and concrete visions for a better world. They work with practices like artistic research, cooperation, co-creation and other methods of qualitative research. The overriding goals are fairness, transparency and sustainability.

Course Details

Course organisation**First semester**

- Social Design Science + Practices A
- Design Research
- Social Campaigning
- Art, Society + Change
- Marketing and Branding
- Profession and Best Practice I

Second semester

- Social Design Science + Practices B
- Sustainable Innovation I
- Sustainable Innovation II
- Social Design Internship
- Sociology and Branding
- Profession and Best Practice II

Third semester

- Design Thinking / Research
- Design Thinking / Synthesis and Creation
- Design Thinking / Realisation and Prototyping
- Social Design Manifesto + Portfolio
- Design Practices
- Profession and Best Practice III

Fourth semester

- Master's Thesis + Colloquium

A Diploma supplement will be issued

Yes

International elements

- Projects with partners in Germany and abroad

Course-specific, integrated

No

German language courses

Course-specific, integrated English language courses	No

Application deadline

Non-EU/EEA applicants: Please [apply](#) by 1 February (April intake) or 15 August (October intake). We also recommend that you apply early (at least four months before the start of your programme).

EU/EEA applicants: Please [apply](#) by 1 April (April intake) or 1 October (October intake).

Submit application to

Please use our [online application system](#) to submit your application.

Services

Possibility of finding part-time employment

Working as a non-EU citizen:

In possession of a valid German residence permit for study purposes, you are allowed to work for up to 120 full days (full day = eight hours per day) or 240 half days (half day = four hours) during the calendar year. However, freelance work is not permitted. Internships that are mandatory for the successful completion of your studies at SRH Berlin do not count towards the above-named 120 full days.

Employment that is considered "student part-time work" ("studentische Nebentätigkeit", e.g. employment as a student worker at a university or in a university-related organisation or "Werkstudent" activities at companies that are related to your studies) can be done without any time restrictions.

Accommodation

We do not own any student dormitories or hostels. However, we provide assistance in selecting accommodation prior to and after your arrival in Berlin.

Career advisory service

Our Career Service supports students and alumni in planning their careers and sharpening their professional profile. Our service portfolio includes:

- Consultation services for students
- Career trainings and workshops
- Annual "Career Day" with job fair and workshops
- Support in finding a job or an internship for graduates and students

Support for international students and doctoral candidates

- Welcome event
- Buddy programme
- Specialist counselling
- Support with registration procedures

SRH Universities

Our campuses in Berlin, Hamburg and Dresden

© SRH Berlin University of Applied Sciences

SRH Berlin University of Applied Sciences is a state-accredited university that offers Bachelor's, Master's and MBA programmes in English and German.

Our six schools in Berlin, Dresden and Hamburg combine modern management and entrepreneurship, hospitality, media and creative industries, technology and IT, music and sound design in modern study programmes.

All schools focus on hands-on project work in small teams, an individual learning experience, and personal supervision by lecturers with real business experience.

With its more than 2,000 students from 100+ countries, SRH Berlin University of Applied Sciences is one of the most international

universities. In addition to an international atmosphere, our students enjoy the opportunity to get in touch with industry partners and create a professional network through internships and company projects. We offer a wide range of services to support you in finding an internship, organising a semester abroad, and taking care of important tasks during your studies. With this support and environment, our students are prepared for careers in different industries around the globe.

The university belongs to the SRH Holding, a non-profit organisation with its headquarters in Heidelberg. As a leading provider of educational services, SRH operates universities, schools, and professional training centres. SRH Berlin is one of seven universities within the group with more than 14,000 students.

University location

With its population of 3.7 million residents, **Berlin** is the German capital, the largest city in Germany and the second most populous city in Europe. Apart from being a hub for higher education and research, the city is very multicultural: people from 190 nations live here, 20% of its residents come from abroad and every one in three Berliners is a first-generation or second-generation immigrant. Students in Berlin benefit from a high quality of life and a huge range of recreational activities: festivals, museums and sports events are seen everywhere. Additionally, a third of the city area is composed of parks, rivers and lakes. Berlin is a centre for politics, media and science, and it is renowned for its culture and arts scene as well as its buzzing nightlife. It is rich in history and historical monuments and has a well-connected public transport system that students can use with their discounted public transport tickets. Well-known for its innovation capacity, the German capital has a vibrant start-up scene and is known as a start-up hotspot in Europe. In addition, Berlin's low living costs and moderate rental prices, compared to other capital or European cities, make the city very attractive for both international and domestic students.

Dresden is a perfect study location. Not only is the city of art and culture a popular tourist destination with its many famous sights, but it has also developed into one of Germany's strongest and most dynamic economic locations over the past few years. As living costs and rental prices are still relatively low, Dresden is a favourable city for students from around the world. If you add the vast array of cultural events, the diverse nightlife and the city's beautiful location in the Elbe valley, one might not be surprised that Dresden is a great place to live and study in.

Hamburg is a city that is green, lively and economically strong. Located close to rivers and the ocean, Hamburg has more bridges than Venice and is part of the second largest metropolitan region in Germany. Compared to other cities in Germany, Hamburg has moderate living costs, a high standard of living and a secure infrastructure for students. The city's continuous growth makes it one of the most important and largest trade, economic and logistics centres in north-western Europe. International companies and agencies from the aviation, life science, health care, renewable energy and creative industries are based in Hamburg. Young professionals and university graduates benefit from attractive career opportunities in a growing economy and within the IT, media, retail, logistics and renewable energies industries.
