Combined Master's degree / PhD programme	No
Joint degree / double degree	No

Description/content

The Film, Television and Digital Narratives MA programme focuses on the fields of screenwriting, directing and production. You will acquire broad knowledge of each of the core foci of the programme and of the process of film production before you choose one of the three core focuses as your own field of specialisation in the second semester. In collaborative and integrative production processes that are part of the curriculum, you will work together with other students who have picked a different field of specialisation. As the film industry depends on close coordination of different professions, this collaborative experience is essential to prepare you for the professional life that will follow. In the course of two years, you will learn to write, direct, produce or post-produce different formats such as short films, TV series and features, feature films, TV shows, web series and documentary films.

Furthermore, you will learn to analyse and discuss the history and theory of film and TV with a focus on audiovisual film analysis. The cooperation with production companies and TV stations and (international) excursions to festivals extend and deepen your learning experiences from the practice and theory-oriented curriculum. The study programme promotes both artistic films and film as entertainment, while encouraging the development of your very own artistic and professional personality. With these qualities, the course of study is equally artistic and industry-oriented.

The programme is non-consecutive. It provides an opportunity to national and international students with a background in social sciences, humanities or the arts to acquire professional skills in the field of film and television. If you come with prior academic and practical knowledge in the respected field, you can refresh and deepen your understanding and skills in one of the core subjects and advance your academic profile according to your interests or the current market requirements.

Services

Possibility of finding part-time employment

Working as a non-EU citizen:

In possession of a valid German residence permit for study purposes, you are allowed to work for up to 120 full days (full day = eight hours per day) or 240 half days (half day = four hours) during the calendar year. However, freelance work is not permitted. Internships that are mandatory for the successful completion of your studies at SRH Berlin do not count towards the above-named 120 full days.

Employment that is considered “student part-time work” (“studentische Nebentätigkeit”, e.g. employment as a student worker at a university or in a university-related organisation or “Werkstudent” activities at companies that are related to your studies) can be done without any time restrictions.

Accommodation

We do not own any student dormitories or hostels. However, we provide assistance in selecting accommodation prior to and after your arrival in Berlin.

Career advisory service

Our Career Service supports students and alumni in planning their careers and sharpening their professional profile. Our service portfolio includes:

- Consultation services for students
- Career trainings and workshops
- Annual “Career Day” with job fair and workshops
- Support in finding a job or an internship for graduates and students

Support for international students and doctoral candidates

- Welcome event
- Buddy programme
- Specialist counselling
- Support with registration procedures

SRH Universities

Our campuses in Berlin, Hamburg and Dresden

© SRH Berlin University of Applied Sciences

SRH Berlin University of Applied Sciences is a state-accredited university that offers Bachelor's, Master's and MBA programmes in English and German.

Our six schools in Berlin, Dresden and Hamburg combine modern management and entrepreneurship, hospitality, media and creative industries, technology and IT, music and sound design in modern study programmes.

All schools focus on hands-on project work in small teams, an individual learning experience, and personal supervision by lecturers with real business experience.

With its more than 2,000 students from 100+ countries, SRH Berlin University of Applied Sciences is one of the most international universities. In addition to an international atmosphere, our students enjoy the opportunity to get in touch with industry partners and create a professional network through internships and company projects. We offer a wide range of services to support you in finding an internship, organising a semester abroad, and taking care of important tasks during your studies. With this support and environment, our students are prepared for careers in different industries around the globe.

The university belongs to the SRH Holding, a non-profit organisation with its headquarters in Heidelberg. As a leading provider of educational services, SRH operates universities, schools, and professional training centres. SRH Berlin is one of seven universities within the group with more than 14,000 students.

University location

With its population of 3.7 million residents, **Berlin** is the German capital, the largest city in Germany and the second most populous city in Europe. Apart from being a hub for higher education and research, the city is very multicultural: people from 190 nations live here, 20% of its residents come from abroad and every one in three Berliners is a first-generation or second-generation immigrant. Students in Berlin benefit from a high quality of life and a huge range of recreational activities: festivals, museums and sports events are seen everywhere. Additionally, a third of the city area is composed of parks, rivers and lakes. Berlin is a centre for politics, media and science, and it is renowned for its culture and arts scene as well as its buzzing nightlife. It is rich in history and historical monuments and has a well-connected public transport system that students can use with their discounted public transport tickets. Well-known for its innovation capacity, the German capital has a vibrant start-up scene and is known as a start-up hotspot in Europe. In addition, Berlin's low living costs and moderate rental prices, compared to other capital or European cities, make the city very attractive for both international and domestic students.

Dresden is a perfect study location. Not only is the city of art and culture a popular tourist destination with its many famous sights, but it has also developed into one of Germany's strongest and most dynamic economic locations over the past few years. As living costs and rental prices are still relatively low, Dresden is a favourable city for students from around the world. If you add the vast array of cultural events, the diverse nightlife and the city's beautiful location in the Elbe valley, one might not be surprised that Dresden is a great place to live and study in.

Hamburg is a city that is green, lively and economically strong. Located close to rivers and the ocean, Hamburg has more bridges than Venice and is part of the second largest metropolitan region in Germany. Compared to other cities in Germany, Hamburg has moderate living costs, a high standard of living and a secure infrastructure for students. The city's continuous growth makes it one of the most important and largest trade, economic and logistics centres in north-western Europe. International companies and agencies from the aviation, life science, health care, renewable energy and creative industries are based in Hamburg. Young professionals and university graduates benefit from attractive career opportunities in a growing economy and within the IT, media, retail, logistics and renewable energies industries.
