Master's degree

Master's in Sport and Exercise Psychology

Leipzig University • Leipzig

Overview

Degree	Master of Science
In cooperation with	University of Thessaly (Greece)
Teaching language	<ul style="list-style-type: none">English
Languages	Courses are held in English (100%).
Programme duration	4 semesters
Beginning	Winter semester
Application deadline	31 May
Tuition fees per semester in EUR	None
Combined Master's degree / PhD programme	No
Joint degree / double degree programme	Yes
Description/content	<p>Please find all information regarding the Master's programme on our course website.</p> <p>The aim of the degree programme is to qualify students for national and international, research-related work in the field of sport and exercise psychology.</p> <p>Students will acquire extensive expertise in sport and exercise psychology, enabling them to (a) plan, apply for, conduct, evaluate and interpret theory-based studies. Accordingly, students will be able to (b) formulate practical recommendations for action and communicate these to the respective target groups. Students will acquire comprehensive methodological, social, and interpersonal skills for (c) leading sport psychology consulting and team management processes in international, individual and group settings. In addition, students will be able to (d) communicate with stakeholders in English, in both spoken and written settings, in a manner appropriate to their field of work, to cope with intercultural communication barriers, to recognise potential conflicts, and to solve these constructively with the help of adequate communication strategies. Students will also acquire personal and social skills to (e) develop a sport and exercise psychology-related self-concept, subject-specific professionalism, and competence in self-management.</p> <p>Regarding the application process and the requirements for the Master's programme, we also provide more information in our FAQ section.</p>

Course Details

Course organisation

In the first semester, general foundations of the topics dealt with in sport and exercise psychology are reviewed and supplemented by current research trends and methods. In addition, foundations of research methodology and intercultural communication are laid and students' knowledge of specialist terminology in sport and exercise psychology is expanded.

In the second semester, more in-depth study follows, after which the practical relevance of applied fields of sport and exercise psychology are dealt with, building on fundamental elements.

In the third semester of the Master's programme, students have the opportunity to choose between a research-oriented internship or a stay abroad worth 30 credits. Students seeking a double degree are required to stay abroad at the University of Thessaly (for which an additional application is needed). In this case, the university at which the student is first enrolled is referred to as the host university, and the other university is referred to as the partner university.

In the fourth semester, students write their Master's theses.
