Description/content	The Master of Science in Business Management qualifies you for management positions in international companies and organisations. You will focus on project management and applications, acquiring both strategic and operational skills. This Master's programme with a specialisation in Green Energy and Climate Finance is offered by the Berlin Professional School (BPS) in cooperation with the Renewables Academy (RENAC) AG. The programme offers you the following:

- profound knowledge of concepts, theories and applications of business administration and the option to specialise in Green Energy and Climate Finance
- an interdisciplinary understanding of international management to provide students with the necessary skills to develop a career in the renewable energy and energy efficiency financing markets
- excellent career prospects: career paths in renewable energy, energy efficiency and climate finance, from the private sector (renewable energy and climate/energy efficiency project developers and investors), to financing institutions and consultancies, to public organisations, among others
- flexible mode of delivery: You can study at any time and from any location.
- practical: three-day seminar and one week on-campus time with practical exercises, live lectures and networking
- very experienced partners: Berlin Professional School is a German pioneer in higher management education. RENAC, a globally operating expert on training for renewable energy and energy efficiency, serves as a bridge between students and the industry.
