So in order to meet the university application deadlines, you will need to apply for your VPD as early as possible.
Tuition fees per semester in EUR	None
Joint degree / double degree programme	Yes
Description/content	<p>What happens behind the scenes when you order a package? A whole process begins with people and machinery around the world sometimes whirring into action in a matter of seconds. Substantial means of production and global flows of goods keep companies supplied and supermarket shelves reliably filled. In the same way, logistics also ensures good medical care – in our everyday lives or in humanitarian crisis situations.</p> <p>Logisticians are the architects of our modern economy. They create the links between warehouses and production sites as well as between ports and computer networks spread all over the world. So, logistics management could be the course for you if you enjoy planning, organising and working with other people and cultures.</p> <p>What we are particularly concerned about today is how to make our lifestyle sustainable in an</p>

environmentally friendly way and secure supplies of the goods we need in the context of global dependencies. To do this, creative ideas are needed: more than ever before, it is essential to design sustainable logistics that serves people and the environment, and this means thinking in a completely new way. Exciting tasks await graduates in logistics management all over the world – and the International Logistics Management programme at the Franco-German Institute of Technology, Economics and Science will prepare them with a double degree.
