So in order to meet the university application deadlines, you will need to apply for your VPD as early as possible.
Tuition fees per semester in EUR	None
Joint degree / double degree programme	Yes

### Description/content

The construction industry is booming. As a result, the industry is desperately seeking specialists who can plan, manage and see construction projects through to completion. This need exists in almost all industrialised nations of the world as well as in many other countries. That's why the European Construction Management degree course at the Franco-German Institute of Technology, Economics and Science provides the perfect foundation for a career in this sought-after industry.

In the BSc course, students can combine their penchant for technology and business with the French language and an international environment. In their future careers, students will need coordination skills and the ability to take account of cultural differences in their working methods and approaches. It is precisely this sense of culture, language and communication that the Franco-German Institute of Technology, Economics and Science imparts to students in addition to the important construction expertise acquired in the European Construction Management degree

course.

Students will consistently develop their international competences in two semesters in France and two semesters in Luxembourg. Of course, everything revolves around the building itself: who creates the concept of the building? What planning tasks are involved and who carries them out? Who ensures that a structure functions in accordance with its intended use? How does one keep track of general conditions such as costs, deadlines or the client's requirements? These are questions that our course of study equips graduates, as engineers, to answer with ease in their future professional lives.

Depending on the client and the location of the building, the profession of civil engineer with a focus on management will be very diverse in the future. Graduates will be able to work for construction companies, planning offices with a focus on project management, investors, real estate companies, large industrial companies or public institutions, for example.

# Services

---

## Possibility of finding part-time employment

At htw saar, we provide you with information, advice and support on how to find the perfect part-time job either on or off campus. In Saarbrücken, you will be able to find numerous part-time job opportunities for students. Depending on what type of job you are looking for, you may work as an academic assistant at htw saar, or you might prefer to work in a restaurant or a store in town.

For non-EU nationals, depending on their visa/residence permit status, restrictions on the amount of work they are allowed to do in addition to their studies may apply.

For more information, please refer to [www.study-in-germany.de](http://www.study-in-germany.de).

## Accommodation

### htw saar Saarbrücken

Compared to many other German cities, Saarbrücken offers fairly affordable housing for students. Information on all of your housing options in Saarbrücken can be found here:

[Finding a place to stay](#)

The International Office at htw saar will gladly assist you in finding your new home away from home. Just write an e-mail to [study@htwsaar.de](mailto:study@htwsaar.de).

### Université de Lorraine Metz

Université de Lorraine reserves a certain number of spaces in student residences. Find more information at this [link](#).
