Bachelor's degree

Electrical Engineering and Information Technology

Ulm University of Applied Sciences • Ulm

Overview

Degree	Bachelor of Engineering (BEng)
Teaching language	<ul style="list-style-type: none">English
Languages	<p>Courses are held in English. In addition, mastery of the German language is one goal of this degree programme, which is why German language modules are included in almost all semesters.</p> <p>In addition to the compulsory English subjects, German-language electives can also be taken.</p>
Full-time / part-time	<ul style="list-style-type: none">full-time
Programme duration	7 semesters
Beginning	Winter semester
Application deadline	15 July
Tuition fees per semester in EUR	1,500 EUR
Additional information on tuition fees	In Baden-Württemberg, international students must pay course fees of 1,500 EUR per semester, and those studying for a second degree must pay course fees of 650 EUR per semester.
Joint degree / double degree programme	No
Description/content	The Electrical Engineering and Information Technology programme combines a sound theoretical education with a high level of practical relevance. For internships and Bachelor's theses, THU partners with leading industrial companies. In order to further strengthen the practical relevance, THU offers a scholarship programme that excellent students may apply for at the end of the first year. Students entering the programme are financially supported by the companies, and they also gain continuous practical experience by working in the company in parallel to their studies.

Course Details

Course organisation	This seven-semester programme consists of two semesters of basic studies (basics in mathematics,
---------------------	--

physics, computer science, and electrical engineering), four semesters with compulsory modules and some additional selectable modules, and an internship semester in industry. Practice-oriented labs with state-of-the-art measurement and lab equipment are integral parts of all study phases. Modules are supplemented by German as a compulsory language in order to facilitate integration, e.g. during the internship. Practical orientation is a key element in all of our study programmes. We believe that practice-oriented teaching with a strong lab component can offer foreign students a high level of added value. From the first semester on, teaching is based on most modern technology and equipment. After successful completion of this degree programme, you will be awarded the academic degree title of "Bachelor of Engineering".
