## Fees for projects abroad with DAAD funding

Fees for services rendered in projects abroad can be funded if the service in question cannot be obtained from the scientific interest/profile of the project and its staff. The requested fee payments must be calculated on the basis of the fee guidelines of the German university submitting the application. (In the case of consortia, the rate of the member university with the highest remuneration level applies – in accordance with the UN's "Noblemaire principle"). Fees for services in the categories specified below are eligible for funding up to the maximum amount of the remuneration rates listed below.
