*„Sustainable Water Management“ Programme*

## Attachment

### **Types of companies and organizations of the water sector eligible for internships**

- component manufacturers
- engineering companies/consultants
- associations
- utilities
- plant/system manufacturers
- construction companies
- chemical industry
- authorities of the federation or federal states
- municipalities
- water authorities
- corporations under public law concerned with water management and regulation of resources

Scholars are free to suggest other suitable internships in companies or authorities. They would need to be closely linked to the water sector, e.g. process and operational management of wastewater treatment plants in manufacturing industries, etc.
