

CONFERENCE

18TH – 19TH JUNE 2019
BERLIN

REFUGEE COACHING NETWORK

COMMUNITY INITIATED ORGANIZATION BY KENYA REFUGEE ELITES
REFUGEE COACHING NETWORK is a refugee community-based organization that was initiated to fill the identified gap of dependency syndrome.

AT A GLANCE

The Refugee Self-Management Project - Refugee camps can play a big role in shaping the lives of many; not only in terms of humanitarian support, but by providing a lifelong support through educating the refugees who will one

day seek for a durable solution. Thanks to the great and noble support from the international donors who have seen the need for education as a prerequisite. However, the setback in our endeavours has always been

linked to national policies and lack of funding; that is, the sequestration and lack of mobility.

CORE OBJECTIVES

1. Breaking dependency syndrome

2. Training of community members

ACHIEVEMENTS SO FAR

Through the empowerment of refugees through education, a lot of projects have been initiated to fill the identified

gaps in the community, for example, initiation of dafikeso.so, Mentorship,

Trainings and many other activities to give back to our refugee community

LESSONS LEARNT

As refugees, we can break away from the created vulnerability and live as people who have hands, heads, legs

and all our senses functioning while living in encampment. And through education, refugees are able to

contribute to the intellectual world, knowledge about their experience
