18TH – 19TH JUNE 2019
BERLIN

ACTIVITIES CARRIED OUT BY REFUGEE STUDENTS

The poster shows the percentage of students in tertiary level

AT A GLANCE

The urban refugee student committee in Chad is a structure that is divided into two groups, committee, and community.

We have started since September 2016. The idea came from a real observation for lack of communication and exchange between the refugee students. Why we are decided to set

up this committee. The activities we often do are: Awareness meetings; training; descents; Cultural and sporting activities. we have partners like UNHCR, Chads Innovation (AnyBody Can Dream Generation).

The training project was implemented by strengthening the capacity of refugee students

with certain partners. They involve us in various activities that they organize. Our approach is to foster social inclusion with the host population. With some partners, for example Chads Innovation and Generation AnyBody Can Dream is a project that will facilitate the socio-economic integration of refugee students.

CORE OBJECTIVES

1. Our educational goal is to make it easier for young refugees to have the same education as other students in the world.
2. Our social objective is to facilitate the inclusion and good peaceful cohabitation of young refugees in their country of asylum, by sensibilisation for the schooling of girls; gender-based violence and many other activities
3. Our economic goal is to facilitate the empowerment of refugee students by giving them the tools they need. From where we initiate training in entrepreneurship.

ACHIEVEMENTS SO FAR

- We organize information and awareness sessions on various topics; our topics are about health, education, culture etc.
- Training; much on capacity building in entrepreneurship and empowering refugee students, we can count two hundred and fifty-five young touches.
- Organization of cultural and sporting activities to raise awareness of peaceful cohabitation.
- Moral assistance (In case of death or illness, we assist our colleagues to strengthen them morally).
- Our beneficiaries are the refugee students and Chadian students.
- We had to carry out with our partners six certifying training in capacity building of young refugees of which there are 207 certificates obtained by refugee students and 12 training and awareness workshop always in the framework of strengthening their capacity.

LESSONS LEARNT

1. Cultural and Sports activities worked well
2. Achievement of financed projects worked well
3. The training offered by our partners worked well
4. sensibilization meetings do not work well.
5. Moral assistance does not work well
6. The lesson learned from our partners is that we see ourselves involved in various activities, our interests are taken into account,
7. We have the human resources, we have the management capacity in our community. All this is to bring us to contribute to the development
